# “Introduction”

- ⦿ Nowadays technology has brought a lot of changes to our life, especially in education and communication. In communication, the major changes happen in the way we communicate with other people. We do not need to meet them in person or face to face to say what is in our mind. We simply can phone them or do video chat using Internet connection.

# Advantages & Disadvantages

## ⊗ Advantage: Great Discoveries In All Industries:

Technology advances show people a more efficient way to do things, and these processes get results. For example, education has been greatly advanced by the technological advances of computers. Students are able to learn on a global scale without ever leaving their classrooms.

## ⊗ Disadvantage: Dependency

The more advanced society becomes technologically, the more people begin to depend on computers and other forms of technology for everyday existence. This means that when a machine breaks or a computer crashes, humans become almost disabled until the problem is resolved. This kind of dependency on technology puts people at a distinct disadvantage, because they become less self-reliant.
